

2009-10 Program Assessment Update

Department & Program: PEHR Community Health

submitted by: Robin Pickering

As one part of ongoing program assessment at Eastern Washington University, each department is asked to report on assessment results for *each* program for *at least one* Student Learning Outcome this year. Use this electronic file to report on your program assessment for AY 2009-10, and please submit it to both your Dean and to Academic Affairs (SHW 220) by Nov. 1, 2010. The following definitions explain the assessment information you'll enter in the table below:

1. **Student Learning Outcome:** The student performance or learning objective as published either in the catalog, the AIEA assessment data portal, or elsewhere in your department literature.
2. **Strategy or method of measurement:** Mode and process through which student performance data was gathered. Examples: embedded test questions in a course or courses, portfolios, in-class activities, standardized test scores, case studies, analysis of written projects, etc. Additional detailed description could describe the use of rubrics, etc. as part of the assessment process.
3. **Observations gathered from data:** The findings and analysis of those findings from the above strategies.
4. **Actions recommended based on observations:** Course (activities or content) or program changes recommended.
5. **Plan and timeline for taking action:** How the recommended actions will be implemented, and in what timeframe.
6. **Overall evaluation of progress on objective:** The extent to which the student learning outcome is still valid and the assessment of it is producing important and meaningful data.

Please fill out a separate assessment table for each program of study (e.g., one table for BA-Art, another for BAE-Visual Arts, etc.) As needed, add additional rows to the table for each student learning outcome for which you gathered assessment results during 2009-10.

1. Student Learning Outcome	2. Strategy or method of measurement	3. Observations gathered from data	4. Actions recommended based on observations	5. Plan and timetable for taking action	6. Overall evaluation of progress on objective

Student will effectively implement health education strategies, interventions, and programs.	Students participated in a service learning project in which they implemented health education strategies, interventions, and programs in a Medical Lake High School nutrition fair and educational session.	Students submitted written documents with minutes from each meeting and presented a final project presentation and portfolio. 100% of students enrolled in the course successfully completed the implementation.	Continue with service learning project in Senior Capstone.	Continue to include the Medical Lake classroom teaching experience in the Capstone Course to enable students to implement health education strategies, interventions, and programs.	This objective / skill is important for preparing students to sit for the Certified Health Education Specialist Exam (CHES), and should continue to be a part of the Community Health Curriculum.

Consult the example of a completed assessment table on the following page. If you have questions, please contact Leslie Swannack at x4675 in Academic Affairs.
